the Weather Bigger the Proof.

As the weather grows warm, the sale of James Pyle's Pearline Washing Compound rapidly increases. This proves that many women recognize the fact that PEARLINE makes washing and cleaning very much casier than when done with the ordinary means. Proves also that summer clothing, being of delicate texture and color, will not stand the rough usage necessary when washed with soap, and establishes the fact that PEARLINE, in doing away with the subbing, lessens the wear and tear and fills a very important place. Delightful for bathing in fresh or salt water Its ingredients render it

harmless to the most delicate skin. Especially during the hot weather it is to your advantage to use PEARL-INL and only humane to supply your servants with it ind thus lighten their labors, besides you insure much better results. Beware of imitations. JAMES PYLE, New York
